

Accelerate the Heartbeat of Your Business

SAP deployments for mission-critical infrastructure, built on more than two decades of experience

Learn more at www.suse-x-lenovo.com

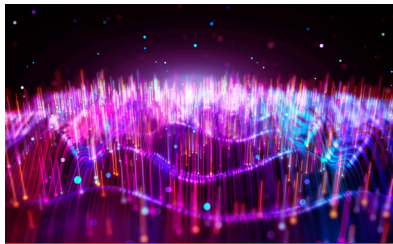

Navigating SAP Landscapes in a Dynamic World

SAP systems often run on a mix of generic hardware, unsupported OS configurations, and costly add-on tools that require large consultant teams to maintain. Furthermore, enterprises face a rapid shift to cloud-native architectures that demand on-premises Kubernetes skills.

Open Technology Offers Profitable Solutions

SUSE and Lenovo have co-engineered SAP environments for over 20 years, validating every layer together, from silicon to software. Their solution ensures security and data sovereignty within your own data center while embracing cloud-native capabilities.

A Fresh Approach to Mission-Critical

Moving to Cloud-Native

SUSE Rancher for SAP is the only turnkey, SAP-validated platform that gives you the complete picture.

Data Sovereignty

The SUSE-Lenovo on-premises solution ensures security and governance remain within your own perimeter.

Enterprise Agility

You can be sure to get the performance, scalability, and reliability needed for your SAP workloads.

The SUSE and Lenovo Strategic Partnership

The close SUSE-Lenovo collaboration means it isn't just two vendors pointing fingers when something goes wrong; it's one supported stack for your mission-critical SAP systems, tested and proven across thousands of deployments and built on decades of experience.

Unlocking Potential. Accelerating Innovation.
